

Features

The right to education is a basic human right. We acknowledge that from the Government and many other organizations even at the private spectrum there are many schools in existence. Still there is a long way to meet the global standards in education. Its growth is seriously outpacing due to lack of adequate infrastructure and balanced qualitative development.

There are many overcrowded classrooms in schools of rural areas, shortage of qualified teachers, learning materials, playgrounds, outdoor classrooms, physical training arrangements etc. We prefer students to learn Arabic, English, and Information Communication Technology (ICT) besides regular curriculum for holistic development and enhanced competency. Physical fitness is a major focus in our efforts.

The school is established on 4 acres of land with an ideal setup to accommodate all educational needs of children for approximately 300 Students.

- a. Residential
- b. Equipped Classroom
- c. Library
- d. Dining Hall
- e. Religious Activities
- f. Sports Facilities
- g. Computer Laboratory
- h. Science Laboratory
- i. First Aid Facilities

SPARTAN
ACADEMY

Striving for Excellence

Why Spartan?

Spartan resembles a person of great courage and self-discipline. Spartans were tough and good fighters. As we envisage our students to become future leaders, so we want them inculcating the attitude of determination and leadership with robust physical fitness.

Mission

To help underprivileged young girls excel in quality education and leadership with moral, ethical and social responsibility towards family, society, country and technologically advanced world

Concept of the School

- a. The school will be a residential one from grade 6 to 12.
- b. Each class will have two sections with 20 students in each section. (May vary as per need).
- c. Pre-primary and primary grades may be introduced gradually as feeder schools in adjacent areas if resources are available.
- d. The school will endeavor to make entire 24 hours of the day for the development of the students.
- e. Prayer will be obligatory.
- f. Students will learn how to read Quran correctly.
- g. Students will be inspired to learn at least one vocational trade work.
- h. Physical fitness will be focused through morning PT, games and sports etc.
- i. Communication and presentation skills will be developed by maintaining track record of individual students.
- j. Driving, swimming and similar life skills will be developed with due importance.
- k. Students will participate in community work in coordination with local authorities.
- l. There will be adequate study tour for students covering industries, hospitals, airport, seaport, historical sites, cantonments etc to help them understanding in depth how things work.
